## Technical Data Sheet

### PSD-500™

#### Section 1. Product Information

PRODUCT NAME	PSD-500™	PH	6-8
CHEMICAL CATEGORY	Solvent Degreaser	FOOD GRADE	no
CHEMICAL TYPE	Formulated Solvent	ODOUR	Solvent
VISCOSITY	Thin Liquid	COLOUR	Clear
FLAMMABILITY	Flammable		

#### Section 2. Product Description

**PSD-500** is a clear solvent-based degreaser used for heavy grease and oil cleaning applications. It contains various surfactants to allow deeper penetration into heavily soiled applications. All finished cleaning applications should be rinsed with water and left for few minutes to dry. If cleaned and dried properly, there will be no oily residue left on any metal parts.

**PSD-500** has a blend of solvents to dissolve stubborn oil, light and medium duty tar and grease from most surfaces.

**PSD-500** is suitable for cleaning engine parts, chains, bearings, and engines.

**PSD-500** is best used in dip tank applications.

**PSD-500** has an optimum level of wetting agents to enable it to penetrate porous surfaces and be effective, yet still rinse off easily.

**PSD-500** is non-caustic, non-acid and therefore completely safe for use on all metals, including aluminum and will not cause corrosion problems.

**PSD-500** contains sequestering agents which enables it to be used in hard or soft water areas effectively.

**PSD-500** is volatile and therefore should be stoppered on storage.

**PSD-500** has anti corrosion agents built in to reduce corrosion.

**PSD-500 does not remove paint.**
